Supplement: Log Wage Regressions

The main text of this report presents the wage regressions with coefficients transformed to percentages for ease of exposition. The tables (**Tables S1–S6**) in this Supplement report the underlying ordinary least squares regression of log wages on the dependent variables for each occupational group, with coefficients in log units and robust standard errors in parentheses.

TABLE S1
Healthcare Professionals: Log Wage as a Function of Work Location and Demographic Characteristics: 2005 and 2015 Compared

Variables	Model 1		Model 2 (with interactions)	
	2005	2015	2005	2015
Outpatient location	-0.090*** (0.015)	-0.178*** (0.012)	-0.042 (0.034)	-0.135*** (0.029)
Female	-0.147*** (0.013)	-0.197*** (0.012)	-0.134*** (0.014)	-0.185*** (0.013)
Black	-0.089*** (0.020)	-0.101*** (0.016)	-0.093*** (0.021)	-0.104*** (0.017)
